We are a small upstart company specializing in custom web site design, small business network design, custom computer design, and personal/business computer repair/upgrade. <br />I started this company two years ago in Saint Louis, but have decided to move back closer to where I grew up. <br />Choose my company if you are looking for high quality web design work, at flexible and affordable prices. I have seen some of the work of my competitors, and I think you deserve better for your small business.<br />Also, don't forget about the gamer in your life! We custom design gaming and business computers to fit your' specific needs.
